

Ammune.ai: The Leading Choice for Next-Gen API Security

Executive Summary:

In the evolving landscape of API threats, Ammune.ai stands out as the only air-gapped, AI-native API security platform, purpose-built to operate autonomously in sensitive environments. While large incumbents like Akamai (via its acquisition of Noname Security) offer cloud-native and managed options, Ammune.ai delivers unmatched privacy, control, and intelligence for modern enterprises.

Key Differentiators of Ammune.ai

Air-Gapped, Autonomous Deployment

- Ammune.ai is designed to run completely offline—ideal for highly regulated sectors (finance, defense, healthcare).
- No SaaS dependency. No data leaves the customer environment.
- Native support for on-prem, hybrid, containerized, and DPU environments.

Real-Time, Inline AI Mitigation

- Ammune's patented AI engine detects and mitigates unknown attacks from the very first API request.
- Unlike delayed detection models, Ammune.ai acts instantly—stopping bots, abuse, and logic attacks in real time.

Modular & Lightweight Architecture

- Plug-and-play modules for API-WAF, Bot Mitigation, API Discovery, and more.
- Rapid deployment with minimal changes to existing infrastructure.

True Data Sovereignty & Compliance

- GDPR and local data residency compliance ensured via full deployment within client's data center or VPC.
- No third-party data sharing or cloud relay.

Zero Touch, Zero Noise

- No need for manual tuning or constant analyst feedback.
- Ammune's self-learning algorithms adapt autonomously to each API's behavior profile.

Why Ammune.ai Over Akamai + Noname?

Feature	Ammune.ai	Akamai + Noname
Deployment	Air-gapped, on-prem, no SaaS	SaaS/Cloud with edge network
Privacy & Data Control	Full—data never leaves customer network	Cloud-based processing & sampling
Real-Time Mitigation	Inline AI, immediate	Depends on flow & external analysis
API Testing (Shift-Left)	Limited	Strong (developer-focused)
Managed Services	Self-managed or via partner	Full 24/7 MSSP available
Ecosystem Integration	Firewall, SIEM, Load Balancers	Broad API gateway/CDN integrations

Ideal For:

- Banks, Governments, and Enterprises with strict data privacy needs
- Environments requiring air-gapped, offline, or cloud-restricted deployment
- Organizations seeking real-time, zero-day mitigation of API-based threats

Conclusion:

Ammune.ai redefines what it means to be secure in an API-first world. With real-time, inline protection, no cloud dependencies, and true data sovereignty, Ammune.ai is the top choice for enterprises where control and privacy cannot be compromised.
